CITIZENSHIP USA

RESEARCH COLLABORATIONS **The Kitt Peak EMCCD Demonstrator (KPED)** (Project Scientist) 2018-present
The Zwicky Transient Facility (ZTF) 2017-present
Panoramic Survey Telescope and Rapid Response System (Pan-STARRS)
and **The Asteroid Terrestrial-impact Last Alert System (ATLAS)** surveys for
EM counterparts of GWs, 2015-present
Large Synoptic Survey Telescope (LSST), 2013-present
Laser Interferometer Gravitational-wave Observatory (LIGO), 2008-present

RESEARCH HIGHLIGHTS I have been fortunate to work on a variety of projects related to astrophysics. As an undergraduate at Carleton College, I performed detector characterization related studies for LIGO and Virgo, spending a summer doing seismic site analyses at Virgo. As a Churchill scholar at the Institute of Astronomy in Cambridge, I performed parameter estimation of gravitational wave data, in particular compact binary coalescences. During graduate school at Harvard, I joined LSST, whereby I built and characterized a prototype calibration system as well as an all-sky camera system for site monitoring. I also used arrays of seismometers on the Earth and moon to set upper limits on a low-frequency gravitational-wave background and developed novel gravitational-wave detection algorithms used on the most recent LIGO data. I am now a post-doc at the California Institute of Technology, where continue working to bridge the gap between gravitational-wave and observational astronomers working in the electromagnetic regime with ZTF.

PROFESSIONAL EXPERIENCE **California Institute of Technology**, Pasadena, CA

David and Ellen Lee Prize Postdoctoral Fellow

September 2017 - present: Postdoctoral Fellow in Physics to Professor Rana Adhikari, PhD, California Institute of Technology; Professor of Physics.

Undergraduate Researcher

June 2011 to August 2011: Research Assistant to Dr. Jan Harms, PhD, California Institute of Technology

Harvard University, Cambridge, MA USA

Postdoctoral Fellow **September 2016 - September 2017: Postdoctoral Fellow in Physics to Professor Christopher Stubbs, PhD, Harvard University; Professor of Physics.**

Graduate Researcher **September 2013 through September 2016: Research Assistant in Physics to Professor Christopher Stubbs, PhD, Harvard University; Professor of Physics.**

University of Cambridge, Cambridge, UK

Graduate Researcher

August 2012 through July 2013: Research Assistant in Astronomy to Jonathan Gair, PhD, University of Cambridge.

Virgo Gravitational Wave Detector, Cascina, Italy

Undergraduate Researcher **June 2010 to August 2010: Research Assistant to Dr. Irene Fiori, PhD, European Gravitational Wave Observatory**

Carleton College, Northfield, MN USA

Undergraduate Researcher

September 2008 through June 2012: Research Assistant in Physics to Professor Nelson L. Christensen, PhD, Carleton College; Professor of Physics.

Undergraduate Researcher

September 2009 through June 2010: Research Assistant in Physics to Professor Dwight Luhman, PhD, Carleton College; Professor of Physics.

Mathematica Tutor

March 2009 through June 2012: Part-time tutor in the Mathematica lab.

EDUCATION

Harvard University, Cambridge, Massachusetts, USA

PhD, Physics, September 2016

- Thesis title: “Gravitational wave astronomy in the LSST era”

AM, Physics, 2015

University of Cambridge, Cambridge, England

MPhil, Astronomy, 2013

- Thesis title: “Parameter estimation of gravitational-wave data”
- Churchill Scholar

Carleton College, Northfield, Minnesota USA

B.A., Physics and Astronomy and B.A., Mathematics, 2012

- Summa Cum Laude
- Phi Beta Kappa
- Elected to Sigma Xi

AWARDS

Post-Doctoral

David and Ellen Lee Prize Postdoctoral Fellowship, Caltech, 2017

Harold T. White Prize for Excellence in Teaching Physics, Harvard, 2017

Breakthrough Prize in Fundamental Physics (LIGO and Virgo Collaborations), 2016

Classical and Quantum Gravity Outstanding Reviewer Award, 2016

Graduate

Gertrude and Maurice Goldhaber Prize, Harvard (outstanding graduate student in experimental physics), 2016

National Science Foundation Graduate Research Fellow, 2013-2016

Winston Churchill Scholar, 2012

Undergraduate

California Institute of Technology Summer Undergraduate Research Fellowship, 2011

Barry M. Goldwater Scholarship, Honorable Mention, 2011

National Science Foundation Gravitational Physics International REU, 2010

Carleton College

- Patricia V. Damon Scholar (awarded to ten juniors based upon merit) (2011)
- Dean's List Recognition
- National Merit Scholar Award (2008-2012)
- Distinguished Scholar Award (2008-2012)
- Kolenkow Reitz Physics Research Fellow (2008-2012)

COURSES TAUGHT

Harvard University (Teaching Fellow)

Spring Semester 2017: PS12a

Spring Semester 2016: PS12a

February 2016: MATLAB Bootcamp

INVITED

RESEARCH VISITS

June 2016: Queens University, Belfast, UK

June 2015: University of Washington, Seattle, WA

SCIENTIFIC TALKS & PRESENTATIONS (SELECTED)

December 2018: Gravitational Wave Physics and Astronomy Workshop, College Park, MD

“Implications of dedicated seismometer measurements on Newtonian-noise cancellation for Advanced LIGO”

November 2018: Future by the Future, New York City, NY

“Compact White Dwarf Binaries in the Optical Time Domain”

October 2018: Center for Gravitation, Cosmology & Astrophysics Seminar, Milwaukee, WI

“Searching for the aftermath of binary neutron star mergers”

September 2018: Institut d'Astrophysique de Paris Seminar, Paris, France

“Search for and characterization of optical counterparts of gravitational waves”

August 2018: Laboratoire de l'Accélérateur Linéaire Seminar, Orsay, France
“Mitigation of the effects of seismic noise in gravitational-wave detectors”

August 2018: IAU General Assembly 2018, Vienna, AUS
“Testing of the LSST’s photometric calibration strategy at the CTIO 0.9 meter telescope”

June 2018: SPIE Astronomical Telescopes + Instrumentation, Austin, TX
“Testing of the LSST’s photometric calibration strategy at the CTIO 0.9 meter telescope”

May 2018: Gravitational-Wave Advanced Detector Workshop, Girdwood, AK
“Implications of dedicated seismometer measurements on Newtonian-noise cancellation for Advanced LIGO”

January 2018: AAS Meeting, Oxon Hill, MD
“On the sensitivity of ATLAS and PS1 followup of O2 LIGO events”

March 2017: LIGO-Virgo Collaboration Meeting, Pasadena, CA
“Limiting the effects of earthquakes on gravitational-wave interferometers”

September 2016: LIGO Seminar, Pasadena, CA
“Maximizing the sensitivity of LIGO and the electromagnetic followup of its events”

June 2016: SPIE Astronomical Telescopes + Instrumentation, Edinburgh, UK
“A collimated beam projector for precise LSST throughput calibration”

TECHNICAL SKILLS Computer Programming: Matlab, Python, C, HTML, Mathematica, Bash Shell Scripting, LINUX, git, mysql.
Computer Applications: T_EX (L^AT_EX, B_IB_TE_X), vi, emacs
Computer-Aided Design: AutoCad

PROFESSIONAL
ASSOCIATIONS

Sigma Xi: Associate Member

SERVICE

Special Appointment: Winston Churchill Scholarship Science/ Mathematics/ Engineering: Scholar Selection Committee 2018-2019

Referee for Physical Review Letters, PASP, MNRAS, Classical and Quantum Gravity, Applied Ocean Research, Physica Scripta

STEM PUBLIC
OUTREACH

Volunteer at elementary school science nights, Pasadena School District, Pasadena, CA, October 2017 - present

Lecturer in science program, Columbus Elementary, Medford, MA, October 2015 - present

Crazy 8’s recreational after-school math and science club, Cambridgeport Elementary, Cambridge, MA, October 2015 - June 2017

May 2016: Trinity School at River Ridge Senior Class, Eagan, MN

May 2016: Burnsville High School Science Club, Burnsville, MN

December 2015: Burnsville High School Robotics and local Junior High FTC, Burnsville, MN

OTHER PUBLIC OUTREACH

Coach for youth basketball, YMCA, Cambridge, MA, 2016 - 2017

PUBLICATIONS

I have authored or co-authored 154 papers in total. As a member of LIGO, I am co-author on the major discovery papers released in 2016. I highlight here 10 of the 30 papers in which I have significantly contributed as either lead or 2nd author.
